Credit Score Tracker — Free Printable

Download this free credit score tracker to log your score each month and keep an eye on how it is trending.

How to use it

- Check your free score with each of the three main UK credit reference agencies (Experian, Equifax and TransUnion) — each can show a different number
- Log the date, agency and score each time you check
- Note anything that might explain a change (new account opened, missed payment, address update)

Simple ways to improve your score

Pay on time every time, keep credit utilisation low relative to your limits, avoid multiple credit applications in a short period, and register on the electoral roll at your current address. This is general information, not financial advice.
