

Receipt Tracker — Log Every Receipt

A receipt tracker keeps every receipt logged for returns, warranties, expenses and tax records — but if you're self-employed in the UK, a plain log sheet only gets you halfway there. HMRC wants your expenses categorised, VAT separated out if you're registered, and everything kept for years, not months. This page is both: a live tool for logging receipts as they come in, and a proper guide to doing it the way HMRC actually expects.

Date	Retailer	Amount	Category	Receipt?
