

Savings Tracker — Watch Your Savings Grow

A savings tracker makes your progress visible and keeps motivation high. Research consistently shows that people who track their savings save more than those who don't.

How to use it

Set a clear savings goal and a target date. Divide the total by the number of months. Record each contribution as you make it. Colour in or mark the tracker as you go — the visual progress is the point.

Savings tips

- Automate: set up a standing order to move savings on payday, before you can spend it
- Round up: some banks offer automatic round-up saving on purchases
- Use a high-interest account: check the best Cash ISA rates at [MoneySavingExpert](https://www.moneysavingexpert.com)
